

The ultimate modular office light solution.

New for 2009, JCC has expanded its commercial offering with the launch of J-Linea, a high quality range of products for Office, Education, Healthcare and Retail applications.

Developed in response to market and customer needs, this exciting new range incorporates the latest technology with features that recognise modern lighting design requirements.

J-Linea incorporates High Frequency control gear and utilises TC-L and T5 lamp technology to aid low running costs. The range houses products suitable for Recessed, Surface and Suspended applications. J-Linea perfectly compliments our existing product range and guarantees that we can now offer a total lighting solution.
